(a) synthetic, 4 m, D141-like near field
screen error (mm of LOS)
distance from the trace (km, + north)
production (v6)
+ fill matched to the gap
+ first-order filter
+ per pixel, no exclusion
(b) real ionosphere: fake fault zones (34 windows)
rms error inside the zone (mm)
fault zone half-width (km)
plane 10 km (production)
plane 2.6 km
ladder 1.5-3-6-12 km
ladder 2.6-5-10 km
ISCE3's guide
(c) real ionosphere: a one-sided edge strip
rms error (mm)
distance into a one-sided strip (km)
plane 10 km (production)
plane 2.6 km
ladder 1.5-3-6-12 km
ladder 2.6-5-10 km
ISCE3's guide
(d) D141: the cells, per cell and per pixel
cells with coherence > 0.2 in both bands (%)
0-0.5
0.5-1
1-2
2-5
5-10
10-20
distance from the trace (km)
cell, north
cell, south
pixel, north
pixel, south
(e) D141, main band as cut
minus the production screen as cut (mm)
distance from the trace (km, + north)
production
production, first order
plane 2.6
ladder 1.5
ladder 2.6, first order
(f) D141, local cycles repaired
minus the production screen as cut (mm)
distance from the trace (km, + north)
